Excelitas to Display Medical Illumination and Curing Systems at BIOMEDevice

WHO: [Excelitas Technologies® Corp.](#), a global technology leader delivering innovative, customized photonic solutions, will showcase its latest medical illumination and curing systems at [BIOMEDevice](#) in Boston, MA.

WHAT: Products on display at Excelitas' Booth 841 include:

- [Cermax® MX300 All-Metal Xenon Light Source](#): The MX300 Metal-Body Xenon Light Source is the latest innovation from the medical Xenon leader. The new product features 20% more light output than alternative Xenon sources, better uniformity, repeatable alignment and lower system operating temperature.
- [XLMii™ LED Fiber Optic Light Source](#): Offering medical device OEMs simplified integration of LED illumination for endoscopy, surgical microscopy and surgical headlamps, the XLMii LED Fiber Optic Light Source features configurable components that can be quickly adapted to customer requirements, including optional integrated NIR laser or LED source. Product design time can be significantly reduced, allowing for shorter time-to-market.
- [X-Cite® Vitae™ Illumination Solutions for OEM Applications](#): X-Cite delivers illumination solutions with flexible design and best-in-class manufacturing quality to meet the most demanding OEM applications. X-Cite Vitae LED Platforms offer easily integrated, customizable illumination for medical and diagnostic instrumentation.
- [OmniCure® LX500 UV LED Spot Curing System](#): Featuring up to four LED heads with up to 16W/cm² peak irradiance and proprietary feedback technology, OmniCure LX500 provides the highest irradiance available with unmatched optical stability for consistent and repeatable assembly of medical devices with lower costs. It is designed for use in medical devices such as catheters, cannulas, endoscopes and syringes, and electronics applications.
- [μPAX-2 Pulsed Xenon Light Source](#): Combining an innovative lamp design with state-of-the-art circuitry and components, the 2-Watt μPAX-2 pulsed Xenon light source provides microsecond-duration pulses of broadband light with exceptional arc stability. Applications for μPAX-2 include UV/Vis spectrophotometry, point-of-care analytics, environmental and absorption analysis, fluorescence triggering, immunoassays and microplate readers.

WHEN: April 18 – 19, 2018

WHERE: [Boston Convention & Exhibition Center](#), Boston, MA. Booth 841.

About Excelitas Technologies

Excelitas Technologies Corp. is a global technology leader focused on delivering innovative, high-performance, market-driven photonic solutions to meet the lighting, detection and optical technology needs of global customers. From biomedical technology to research laboratory, safety and security, consumer products, semiconductor, energy and environment, industrial sensing & imaging, defense and aerospace, Excelitas Technologies is committed to enabling our customers' success in their end-markets. Excelitas Technologies acquired Qioptiq in 2013 and now has approximately 6,000 employees in North America, Europe and Asia, serving customers across the world. Connect with Excelitas on [Facebook](#), [LinkedIn](#) and [Twitter](#).

Excelitas®, Cermac®, X-Cite®, OmniCure are registered trademarks and XLMii™ and Vitae™ are trademarks of Excelitas Technologies Corp. All other products and services are either trademarks or registered trademarks of their respective owners.
