Si and InGaAs Low-Light Analog APD Receiver Modules (LLAM)

Excelitas' LLAM-1550E InGaAs APD Preamplifier Modules exhibit enhanced damage threshold and greater resilience when exposed to higher optical power densities.

Key Features

- System bandwidth of 50 MHz and 200 MHz
- Ultra-low noise equivalent power (NEP)
- Spectral response range:
 - Si APD: 400 nm to 1100 nm
 - InGaAs APD: 1100 nm to 1700 nm
- Typical power consumption: 150 mW (without TEC powered on)
- ±5 V amplifier operating voltages
- 50 Ω AC load capability (AC-Coupled)
- Hermetically sealed TO-66 flange package for additional heat sinking
- High reliability
- Light entry angle, over 130°
- Model 1060E and 1550E exhibits enhanced optical damage threshold
- RoHS-compliant
- Available in both COTS and custom variations

Applications

- LIDAR
- Range finding
- Laser designation
- Confocal microscopy
- High-speed, extreme low-light detection
- Distributed temperature sensing (DTS)
- Analytical instrumentation
- High-speed, free-space optical communication

Si and InGaAs Low-Light Analog APD Receiver Modules (LLAM)

Table 1. Ordering Guide

Model	Nominal Bandwidth	Wavelength Response	Detector Type	Detector Material	Active Diameter	Comments	
LLAM-900-R5BH		900 nm	C30902EH		0.5 mm		
LLAM-1060-R8BH	200 MHz	1064 nm	C30954EH	Silicon	Silicon 0.8 mm		
LLAM-1060E-R8BH		(optimized)	C30934EH			Enhanced damage threshold	
LLAM-1550-R2AH	50 MHz	50 MHz C30662EH	0.2 mm				
LLAM-1550E-R2AH	30 IVITZ	1550 nm	CSUGGZER	InGaAs	0.2 111111	Enhanced damage threshold	
LLAM-1500-R08BH	175 MHz	1330 11111	C30645EH	IIIGdAS	IIIGaAS	0.08 mm	
LLAM-1550E-R08BH	1/3 IVITZ		C30043EH		0.00 111111	Enhanced damage threshold	

Table 2. Absolute – Maximum Ratings, Limiting Values

	LLAM-1060(E)-R8BH		LLAM-900-R5BH		LLAM-1550(E) (C30645E			
Detector type	(C30954EH)		(C30902EH)		(C30662EH)			
Parameter	Min	Max	Min	Max	Min	Max	Unit	
Photodiode HV bias voltage (Note 1)								
at $T_A = +70^{\circ}C$		600		350		100	V	
at T _A = -40°C		300		210		50	V	
Incident radiant flux, Φ_M , (Note 2) average (Note 3) peak (Note 4) peak (Note 5)		0.1 50		0.1 50	4 (-1550) 1000 (- 1550E)	2	mW mW kW/cm² kW/cm²	
Case temperature								
storage, T _{stg}	-50	85	-50	85	-50	85	°C	
operating, T _A	-40	70	-40	70	-20	70	°C	
Preamplifier bias voltage	±4.5	±5.5	±4.5	±5.5	±4.5	±5.5	V	
Thermo-Electric Cooler (TEC)								
Q _{max} , heat-pumping capacity		0.9		0.9		0.9	W	
V _{max} , rated at 27°C		0.8		0.8		0.8	V	
I _{max} , rated at 27°C		1.8		1.8		1.8	Α	

- **Note 1:** The operating voltage (V_{op}) must remain below the breakdown voltage (V_{br}) , these values are worst-case estimates. HV voltage current should be limited externally to less than 1 mA.
- Note 2: As demonstrated in laboratory conditions.
- Note 3: Based on 0.5 W electrical power on the high voltage (HV) supply.
- Note 4: Test with 30 ns pulse width.
- Note 5: Tested at 1060 nm, 10 ns pulse width and 1 kHz pulse repetition rate
- Note 6: Stresses above those listed under above values may cause permanent damage to the device.
- Note 7: Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Si and InGaAs Low-Light Analog APD Receiver Modules (LLAM)

Information

Excelitas Technologies' LLAM series of Silicon and InGaAs avalanche photodiodes (APD) receiver modules feature an APD, thermoelectric cooler (TEC) and an amplification circuit, all in the same hermetically-sealed modified 12-lead TO-66 flange package for increased heat sinking. The use of a TEC eases the burden on the APD bias control to insure constant responsivity over a 5°C to 40°C ambient temperature range.

The LLAM series modules are specifically designed for the detection of high-speed, low-light analog signals. The Si APDs used in these devices are the same as used in Excelitas' C30902EH and C30954EH products, while the InGaAs APDs are used in the C30645EH and C30662EH products. These detectors provide very good response between 830 nm and 1550 nm and very fast rise- and fall-times at all wavelengths. Just like the C30659 series, the preamplifier section of the LLAM module uses a very low noise GaAs FET front end designed to operate at higher transimpedance than Excelitas' regular C30950 Series.

The LLAM is an inverting amplifier design with an emitter follower used as an output buffer stage. To obtain the wideband characteristics, the output of these devices should be capacitively- or AC-coupled to a 50 Ω termination. The module must not be DC-coupled to loads of less than 2 k Ω . For field use, it is recommended that a temperature compensated HV supply be employed to maintain a constant responsivity over temperature.

Excelitas' InGaAs LLAM-1060E and -1550E Preamplifier Modules, are designed to exhibit higher damage thresholds, thus providing greater resilience when exposed to high optical power densities. The LLAM series modules are offered as standard, RoHS-compliant, commercial off-the-shelf (COTS) products. Excelitas offers customized modules tailored for your specific needs; modifications include bandwidth and gain optimization, use of different APDs, FC-connectorized packaging.

Si and InGaAs Low-Light Analog APD Receiver Modules (LLAM)

RoHS Compliance

The LLAM Series of APD Preamplifier Modules are designed and built to be fully compliant with the European Union Directive on Restriction of the use of certain Hazardous Substances (RoHS) in Electrical and Electronic equipment.

Warranty

A standard 12-month warranty following shipment applies.

About Excelitas Technologies

Excelitas Technologies is a global technology leader focused on delivering innovative, customized solutions to meet the lighting, detection and other high-performance technology needs of OEM customers.

Excelitas has a long and rich history of serving our OEM customer base with optoelectronic sensors and modules for more than 45 years beginning with PerkinElmer, EG&G, and RCA. The constant throughout has been our innovation and commitment to delivering the highest quality solutions to our customers worldwide.

From aerospace and defense to analytical instrumentation, clinical diagnostics, medical, industrial, and safety and security applications, Excelitas Technologies is committed to enabling our customers' success in their specialty end-markets. Excelitas Technologies has approximately 7,000 employees in North America, Europe and Asia, serving customers across the world.
